FOODVERSE AI

Define Problem Statements (Customer Problem Statement Template)

Date	24 October 2026
Team ID	_____
Project Name	FoodVerse AI
Document	Phase 2 — Requirement Analysis
Technology Direction	Python, FastAPI, ReactJS, OpenCV, PyTorch, and Meta LLaMA models
Prepared For	Gen AI Course — Google Cloud
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):
Create problem statements to understand the customer's point of view. The template focuses on what matters to create useful experiences. Each statement identifies the customer, what they are trying to do, the obstacle they face, the reason behind it, and how the situation makes them feel.

Project Statement: PS-2

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-2	A person who wants to make informed food choices.	Identify food, understand approximate nutrition, assess visible freshness signs, find suitable recipes, and plan meals.	Food information is scattered across different tools, and visual checks can be uncertain.	There is no single convenient place combining food recognition, reference-based nutrition estimates, cooking support, and meal planning.	Unsure about which information to trust and frustrated by the effort needed to make food-related decisions.

Scope note: FoodVerse AI provides prototype-level predictions and assistance. Nutrition estimates may be inaccurate, visible freshness analysis cannot confirm food safety, and hygiene observations are not official inspections.

Document status: Initial requirement-analysis draft. Replace the blank Team ID before submission.
